

June 2010

Ann Arbor – Detroit Regional Rail Project Update

Work on all technical aspects of the project continues. View the May 2010 Update for details.

View the photos below to see the progress being made on MiTrain.

This artist's rendering details the MiTrain locomotive. The actual locomotive will be stainless steel, matching the passenger cars.

An artist's rendering of the MiTrain passenger cars.

SEMCOG is the only organization in Southeast Michigan that brings together all governments to solve regional challenges and enhance the quality of life for the seven-county region's 4.7 million people.

This photo shows one pair of the seats that will be refurbished and installed in the MiTrain passenger cars.

The MiTrain project team visited the Progress Rail site to evaluate the progress being made on the truck overhaul. An engineering firm accompanied them to the site to inspect and approve the trucks for safety.

The trucks are the “wheels” of a rail car.

MiTrain will be ADA compliant, featuring platform lifts on each of the passenger cars.
