Ann Arbor – Detroit Regional Rail Project Update

There is an extraordinary amount of work that goes into refurbishing a train car. The Ann Arbor-Detroit Regional Rail Project team took a couple of photos of the progress that is being made to share with you. The first train set should be complete in October to begin the testing and commissioning process.

The interior of the train has been painted. The new floors and seats will be put in next.

All of the windows will have new seals.

SEMCOG is the only organization in Southeast Michigan that brings together all governments to solve regional challenges and enhance the quality of life for the seven-county region's 4.7 million people.

A sample of the flooring and seat fabric.

A shot of the cab car. This is where the engineer sits. The cars were stripped down to check for corrosion and asbestos. This area will be painted next.
